

Deve1R0X

Highly secure and professional computing solutions

About us?

We are a company dedicated to offering **secure computer solutions** supported by a comprehensive work methodology that ranges from the initial analysis of your business processes, design, construction and commissioning of the solution, always guided by a demanding quality assurance plan , comprehensive services oriented to information security and support.

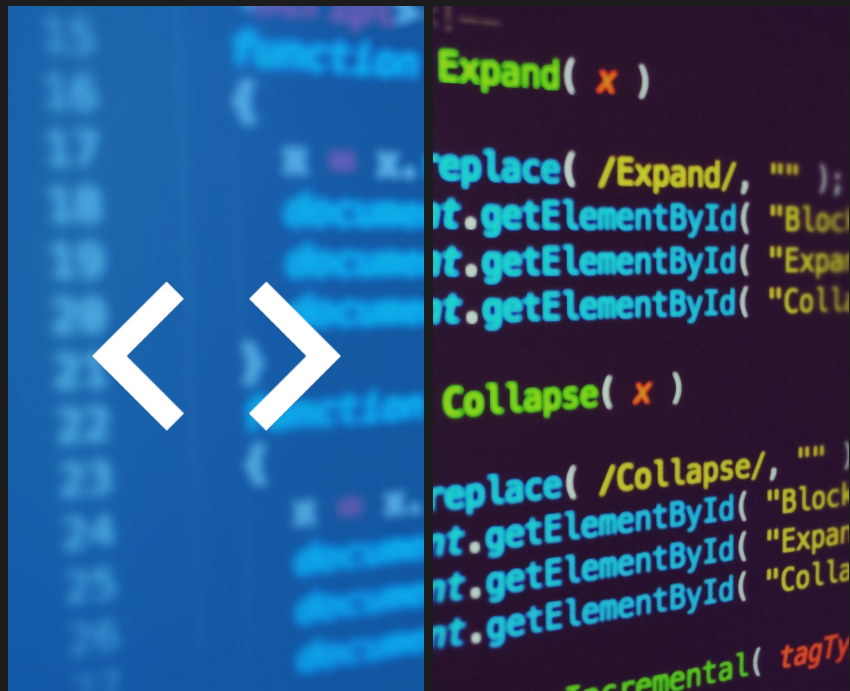

Our mission is to apply ingenuity and innovation to create solutions and applications that positively impact the **benefit of people and our customers**, considering the economic, social and environmental expectations of all participants, showing respect for people and **ethical values**.

Secure Software Development

We have extensive knowledge and experience in creating, modifying and integrating applications based on multiple transactional technologies, architecture, QA, implementation and steps to production.

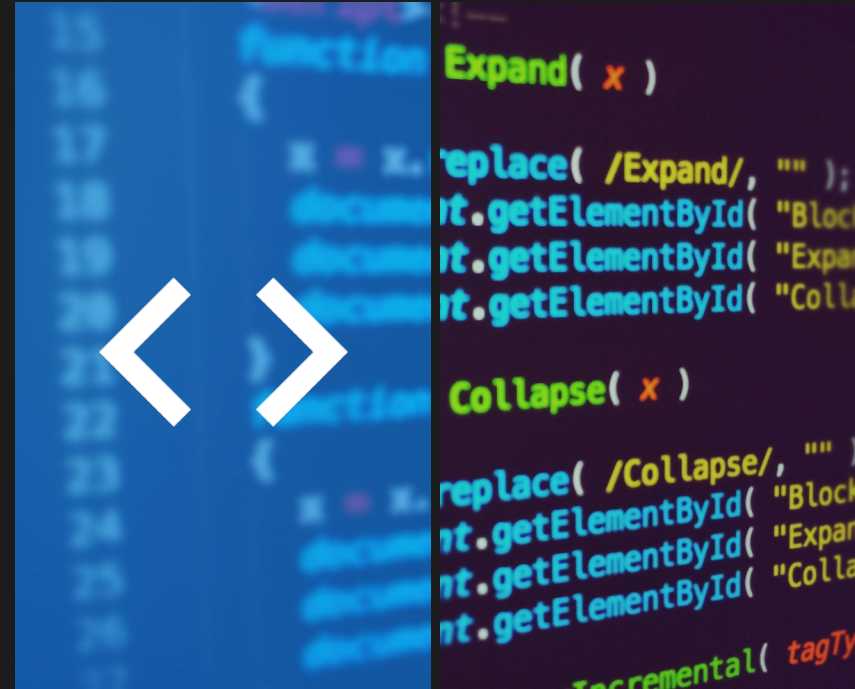

Say no to dependency

We deliver all our source codes and associated documentation in our projects requested by our clients.

Secure Software Development

- Custom software development
- Implementation of services
- Integration and automation of processes and services
- Consulting in applicative architecture
- Vulnerability correction at source code level

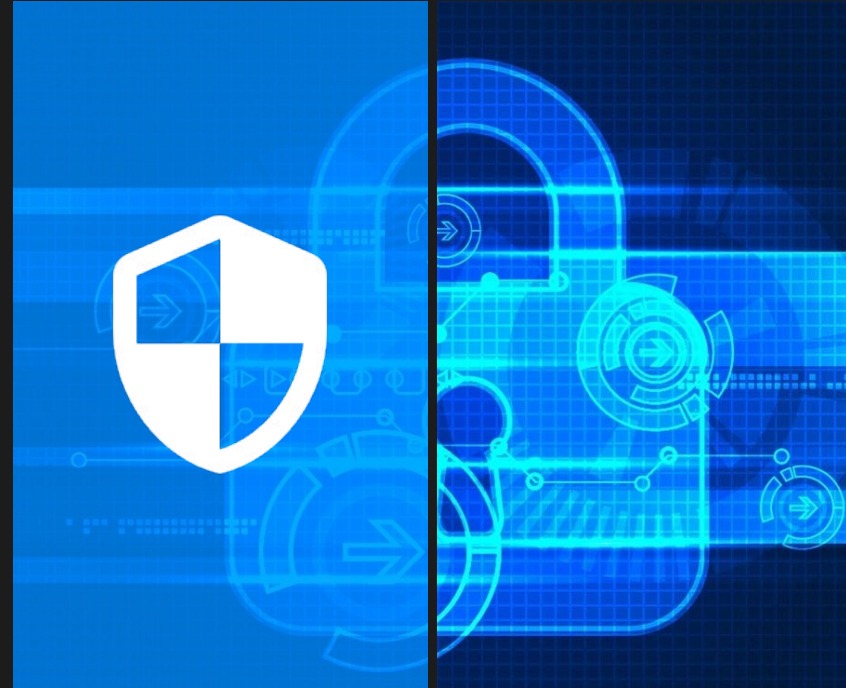

Cybersecurity

Our staff has extensive experience in searching for vulnerabilities **manually**, just as a computer criminal would do but without affecting the normal operation of your applications.

Say no to automation:

An automated vulnerability search software will not give you a real view, they are just one more working tool.

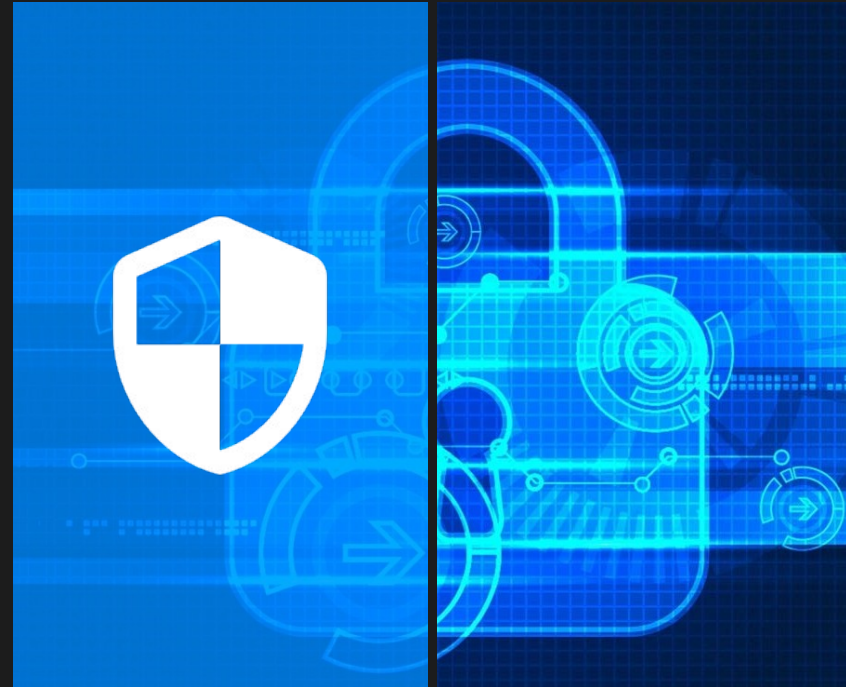

Cybersecurity

- Penetration tests (Ethical Hacking), White Box, Gray and Black.
- Perimeter analysis (security analysis in networks and systems).
- Application analysis, flows and Software architecture (WEB and Mobile).

We adapt to your needs. We create reports tailored to your designs or deliver new structured reports for easy understanding and monitoring based on NVD CVSS scales. All our deliveries have:

- Complete technical report with proof of concept and clear evidence.
- Executive report of no more than 3 sheets with the summary in human format, without fills.

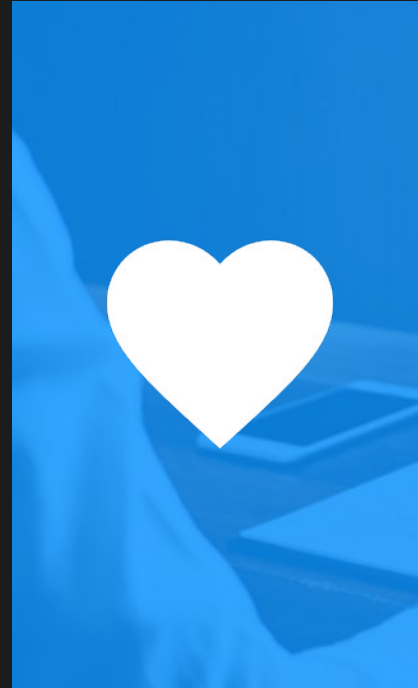

Fundamental pillars of Deve1R0X

Our pillars are founded on ethics, innovation and contribution.

We are faithful to our principles

Each step and service we take is guided by our pillars, this ensures healthy business continuity and continuous growth with our clients.

Enrollment of workers

All our workers have a very strict selection process, given the circumstances, no one can have a history that affects the ethics and integrity of the information.

Say no to crime

We value honesty and ethics above knowledge, thus safeguarding the confidentiality of the information manipulated in our services.

- DevelR0X -

We are ready to be part of your growth process and be an important ally in the short and long term.
If you want more information about our services, do not hesitate to contact us.
